

# ZipLink® : the revolutionary solution for Wood Panel application

## INDUSTRY

Wood

## PRODUCT

Ziplink®

## PROCESS

Wood Panel Application

### Situation

Plants have many belts transporting abrasive wood boards to 110 °C. Customers often have problems with the opened belts because of accidents and wear... this means many hours spent on belts replacement.

### Solution

ZipLink® belts are ideal for any application in which belt replacement time is a significant issue. This innovative belt family is designed to offer benefits in many applications within the Panel Board Industry: grinding, cooling, sanding, polishing, braking, sawing, painting and pre-compressing..

- 560207 Nitrile BX EZP 10/1 01+C37X blue (rough top)
- 560208 Nitrile BX EZP 10/1 01X(NI)+05X(NI) blue/yellow (as shown)

### Benefit & Advantages

- Less downtime
- Less maintenance costs
- Less in-house stock
- Less people needed for installation
- + Constant strength at all types
- + Best heat and wear resistance
- + Strongest joint
